# **RESIDENTIAL PLANNING COMMITMENTS**

## **AT 31 MARCH 2014**

Information on the progress of residential development between  
1 April 2013 and 31 March 2014 in Reading Borough

*Published June 2014*

## EXECUTIVE SUMMARY

This publication looks at commitments for housing in Reading Borough at 31 March 2014. It deals with change in the number of dwellings, based on the planning process. It includes those sites that have planning permission (hard commitments) and those that have been identified in principle as being suitable for housing development (soft commitments).

The key net figures for Reading Borough for the monitoring year 1 April 2013 to 31 March 2014 are summarised below:

Newly permitted dwellings	With permission but not started	Under construction	Total hard commitments outstanding (N/S + U/C)	Soft commitments	Total hard and soft	Completed	Lapsed
544	3,600	720	4,320	2,033	6,353	361	43

In general, a reasonably low number of dwellings have been completed this year, after promising signs of a recovery in housebuilding rates last year. However, the number of dwellings under construction is at its highest level since 2008. In addition, the overall number of dwellings permitted but not started is at its highest level in recent years, so there is no shortage of housing land that can come forward in the near future.

## 1. INTRODUCTION AND BACKGROUND

- 1.1 This document summarises the results of the 2014 survey of Residential Planning Commitments in Reading Borough. Its purpose is to monitor change in the number of dwellings. It is not therefore concerned with changes to the size or form of existing dwellings, unless it would result in a different number of dwellings.
- 1.2 A dwelling includes all forms of permanent residential accommodation (houses, flats, maisonettes etc), excluding caravans, holiday homes, granny annexes and certain types of communal housing such as old people's homes, nurses' and students' hostels and houses in multiple occupation with three or more people<sup>1</sup>.
- 1.3 The changes in dwellings are monitored through the planning process. This document shows the overall change in numbers of residential units in terms of what has planning permission at 31 March 2014, and what has been completed during the monitoring year (1 April 2013 to 31 March 2014). As such, it is a major input into the Annual Monitoring Report, and into other housing monitoring tools, such as housing trajectories and the 5-Year Housing Land Supply.
- 1.4 Surveys of housing commitments have been produced annually for the Berkshire area since 1976. Before 1982 the surveys recorded commitments outstanding at 30 June each year. Since 1982 the survey date has been 31 March. Information relating to conversions, demolitions and changes of use has been included since 1994.
- 1.5 Up until 2010 this information was collected and published for Reading by the Berkshire Unitary Authorities' Joint Strategic Planning Unit (JSPU). However, the responsibility for monitoring of commitments was transferred to Reading Borough Council early in 2011.
- 1.6 The notes in the sections 1 to 3 of this report explain the background to the residential commitments, the methodology involved in carrying out the survey and how to use the schedules.
- 1.7 Section 4 contains the summary tables. These set out summary information for the number of dwellings that are at various stages of the process, including completions, dwellings under construction and new permissions. More details on what is contained in the summary tables is set out in section 3.
- 1.8 Section 5 looks at how the figures from this year's commitments survey compare to those from previous years.
- 1.9 Sections 6 and 7 contain the detailed schedules of the residential sites that have fed into the summary tables, which list all sites with a commitment for housing development within the monitoring year and describe their status at 31 March 2014.

---

<sup>1</sup> In 2013, an Article 4 Direction came into force in much of Katesgrove, Park and Redlands wards to restrict changes of use from C3 dwellinghouses to C4 small houses in multiple occupation (up to 3 unrelated people). For the purposes of the figures in this document, a change of use from C3 to C4 is not counted as a change in the number of dwellings. This is because, since the Article 4 Direction only applies to a specific part of the Borough, these changes cannot be monitored consistently across Reading.

- 1.10 This document has been produced alongside the Non-Residential Planning Commitments at 31 March 2014 document.
- 1.11 For any queries, please contact the LDF Team, Planning Section, Reading Borough Council on 0118 9373337 or [LDF@reading.gov.uk](mailto:LDF@reading.gov.uk).

## 2. METHODOLOGY

2.1 The housing commitments surveys are updated and published each year, covering the monitoring year 1 April to 31 March. The survey is updated in three main stages as follows:

1. All outstanding housing commitments from the 2013 survey<sup>2</sup> were identified, together with relevant planning permissions granted between 1 April 2013 - 31 March 2014. Relevant information, such as whether they would be classed as 'greenfield' or 'brownfield', was also recorded (see paragraph 3.4).
2. All sites were visited by Council officers in order to obtain information on development progress (i.e. number of units completed, under construction and not started). These visits were carried out as soon after 31 March 2014 as possible, during April and May 2014.
3. Finally, the survey information was organised and analysed, and the document prepared for publication.

2.2 Sites which have any of the following characteristics are included in both this document and the Non-Residential Commitments document at March 2014:

- a. Sites with alternative residential and non-residential commitments
- b. Sites with a commitment for mixed-use including both residential and non-residential use; and
- c. Sites where there is a loss of non-residential for residential use, or vice versa.

### 3. UNDERSTANDING THE TABLES

- 3.1 This section describes and clarifies the information presented in the tables in sections 4, 6 and 7.

#### UNDERSTANDING THE SUMMARY TABLES

- 3.2 Section 4 contains seven summary tables, which present information on developments that have not started, are under construction, are outstanding, are agreed in principle, have been completed, were newly permitted this year and have lapsed.

- 3.3 All tables show the following information:
- Number of new build dwellings
  - Number of dwellings demolished (or to be demolished)
  - Number of new dwellings gained through conversion of existing residential
  - Number of dwellings lost through conversion of existing residential
  - Number of new dwellings gained through change of use to residential
  - Number of dwellings lost through change of use from residential
  - Net change in dwellings (the total of the other columns)

- 3.4 As well as an overall total for the Borough, totals within a number of different categories are shown:

- **By Ward**  
Reading Borough Council is broken down into 16 wards (see figure 1). A total for each ward is given<sup>3</sup>.
- **By Development Plan Designation**  
The totals for a number of different planning designations for the area, based on existing and emerging development plan documents (see figure 1):
  - Central Reading - the boundary of Central Reading is the boundary of the Reading Central Area Action Plan (adopted 2009).
  - Smaller Centres - the smaller centres (other than Central Reading) are those listed as district, major local or local centres under policy CS26 of the Core Strategy (adopted 2008). The boundaries are those shown on the adopted Proposals Map, accompanying the Sites and Detailed Policies Document (SDPD) (adopted October 2012).
  - Town Centres sub-total - this is the sub-total for Central Reading and the smaller centres.
  - South Reading - the Core Strategy (adopted 2008) focuses a significant amount of development on South Reading, and this is translated into a South Reading Framework within the

---

<sup>3</sup> No figure for parishes is given, as Reading Borough has no parishes.

SDPD. The boundary used for monitoring this is the definition of South Reading in Chapter 13 of the SDPD.

- Core Employment Areas - policies CS10 and CS11 of the Core Strategy (adopted 2008) refer to Core Employment Areas as being the areas where new industrial and warehousing uses will be focused, and where existing employment will be protected. The boundaries of the CEAs are shown on the adopted Proposals Map, accompanying the SDPD (Policy SA12) and it is these boundaries that are referred to here.

It is important to note that the figures within this set of designations do not sum, because there is some overlap - i.e. some sites will be within both South Reading and a Core Employment Area, or within both South Reading and a defined centre.

- **By Type**

Residential commitments have in the past been broken down into 'brownfield' and 'greenfield' commitments. 'Brownfield' means previously-developed land, and 'greenfield' means previously undeveloped land. It is useful to continue to show this in the table. It is important to note that the definition of 'brownfield' in national policy changed in 2010 to exclude residential gardens. This means that there are inevitably more developments that are counted as 'greenfield' than was the case prior to 2010. It is also important to note that the description as 'brownfield' and 'greenfield' applies to their status after this change in definition, and does not take into account whether they would have been considered as 'brownfield' at the time they were granted permission.

- **By Size**

Residential commitments have in the past been broken down into large, medium and small commitments. It is therefore useful to continue to show this information. The definitions are as follows:

- Large: residential development on sites of greater than 1 ha;
- Medium: residential development on sites of less than 1 ha, but with a net change of 10 or more dwellings;
- Small: residential development on sites of less than 1 ha and with a net change of less than 10 dwellings.

3.5 The seven tables are divided by status, and these are described below.

3.6 **Table 1** shows the number of dwellings with planning permission (including both full and outline) but not yet started at 31 March 2014.

3.7 **Table 2** shows the number of dwellings with planning permission that were under construction at 31 March 2014. The construction process for new build dwellings does not include the clearing of the site (although this will be counted against demolition, if it involves demolition of dwellings), but starts from the digging of footings and laying of foundations, and ends when

work has completed<sup>4</sup>. For conversions or changes of use, this includes the period of making internal alterations.

- 3.8 **Table 3** shows the total number of dwellings outstanding at 31 March 2014. This consists of those not started and those under construction, and therefore is a sum of tables 1 and 2.
- 3.9 **Table 4** shows the number of dwellings without planning permission but accepted in principle. These are known as 'soft commitments', and relate to the schedule set out at Section 7. There are two types of 'soft commitment':
  - Sites where there has been a resolution to grant permission, often at Planning Applications Committee, but where the decision had not been officially issued at 31 March 2014. Usually, this is where the permission is awaiting the signing of a Section 106 Agreement.
  - Sites which are allocated for residential development in an adopted development plan but where planning permission has not yet been granted.
- 3.10 The inclusion of such soft commitment sites in the document and their likely dwelling capacity does not necessarily represent a commitment to approve the development. It is not therefore comparable with an outstanding planning permission, nor is it necessarily an indication of a site's continued acceptability for housing development. All future planning applications on these sites will be considered on their individual merits by the Council.
- 3.11 **Table 5** shows the number of dwellings completed between 1 April 2013 and 31 March 2014. A dwelling is completed for these purposes when work on it has ended, even if it is still unoccupied. This figure inputs into other housing monitoring work, where it is judged against housing provision targets.
- 3.12 **Table 6** shows the number of dwellings newly permitted between 1 April 2013 and 31 March 2014. Its purpose is to show where new sites are coming forward. As such, it does not include developments which are the same as, or similar to, previous or existing permissions on the same site.
- 3.13 **Table 7** shows the number of dwellings for which planning permission had lapsed between 1 April 2013 and 31 March 2014. Planning permissions are generally subject to a condition requiring that work begins within a certain period, and an unimplemented permission lapses when that period runs out. Once lapsed, the developments no longer have planning permission. Although local planning authorities may specify a different timescale if necessary, most permissions use a standard period of three years.

---

<sup>4</sup> It should be noted that the definition of when construction has begun for these purposes may differ from the definition of whether a permission has been implemented for legal purposes.

## UNDERSTANDING THE INDIVIDUAL SCHEDULES

- 3.14 Sections 6 and 7 list the individual sites which have fed into the overall figures in section 4.
- 3.15 Section 6 lists the 'hard commitments'. Hard commitments are sites with planning permission.
- 3.16 Section 7 lists the 'soft commitments'. Soft commitments are sites without a planning permission, but where the principle of residential development has been agreed. See paragraph 3.9 above.
- 3.17 The schedules are ordered by ward, and then code, and in each case, the following information is presented.

- **Ward**  
The ward that the development is in. In the case of development that covers more than one ward, it is listed under the ward in which the largest part of the site falls.
- **Code**  
This is a unique identifier used only for the commitments exercise. Where a site has a number of different commitments, the code for each commitment ends with a /1, /2, /3 etc.
- **Grid Reference**  
The grid reference of the centre point of the development site.
- **Site Area**  
The gross site area of the development in hectares.
- **Address**
- **Application number and type**  
The number and type of the main or most up-to-date planning application on the site. On some sites, there will have been more than one application, including extensions of time, outline or reserved matters, variations of condition etc. Where possible, the description of development and comments in the schedule refers to other relevant permissions.

The type of applications are as follows:

- FUL: Application for full planning permission.
- OUT: Outline application, i.e. a planning application to approve the principle of the development, for which more detailed permission ('reserved matters') is required before building can commence.
- REM: Reserved matters, i.e. the detailed permission to enable an outline permission to be implemented.

- CNV: Application to convert existing residential into a different number of residential units.
- COU: Application for a change of use, either to or from residential.
- CLE: Certificate of Lawful Use (Existing) - an application to ensure that development that has already taken place (often without planning permission) is lawful.
- CLP: Certificate of Lawful Use (Proposed) - an application to ensure that proposed development would be lawful, generally because it would not require planning permission.
- VARIAT: An application to vary conditions on an existing permission.
- EXT: Application for extension of time, to extend the time limit of an existing planning permission.
- PRA: Application for prior approval - recently, a number of types of change of use have been classed as permitted development requiring prior approval only rather than a full application. This includes changes of use from B1 office to residential.

In the case of the development plan allocations in the 'Soft commitments' schedule, the policy reference is used instead of an application number.

- **Applicant**

The person or organisation who applied for planning permission.

- **Number of dwellings**

This shows the number of dwellings (showing the number that are new build, the total of demolitions, conversions and changes of use, and the overall net change) against the status of those dwellings. The columns show the following:

- Perm - overall number permitted at 31<sup>st</sup> March 2014.
- Comp Total - the total number of dwellings completed on that site by 31 March 2014.
- Comp 13-14 - the number of dwellings that were completed between 1 April 2013 and 31 March 2014.
- Under Constr - the number of dwellings under construction at 31 March 2014.
- Not Strtd - the number of dwellings not yet started at 31 March 2014.

- Total Outst - the total number of dwellings not yet completed at 31 March 2014, i.e. the sum of those not started and under construction.

Where a development has lapsed (see above) or has been superseded by a different permission on the same site, all of the figures above will be zero, to avoid double-counting. If so, the schedule will state 'Lapsed' or 'Superseded' underneath the Applicant. Likewise, the figures will be zero if the figures are already counted against another application on the same site.

For the soft commitments in section 7, only one overall set of figures is shown, because no progress can be made until the development has planning permission.

- **Description of development and comments**  
This text describes the proposed development, and its relationship to any other developments shown in the schedule, and includes any other pertinent information.
- **Size**  
Whether a development is Large, Medium or Small (see paragraph 3.4)

## 5. COMPARISON WITH PREVIOUS YEARS

- 5.1 This section compares the key headline figures from the 2014 survey (i.e. dwellings completed, dwellings under construction, dwellings completed and new dwellings permitted) against the figures from previous surveys.

**Table 8: Key Figures - Comparison with Previous Years**

	Completed (net)	Under Construction (net)	Not Started (net)	New Permissions (net)
2003	574	779	2,669	2,666
2004	761	1,195	2,253	629
2005	1,177	679	2,895	1,291
2006	656	747	2,833	576
2007	637	1,028	2,706	624
2008	837	852	2,825	520
2009	782	593	3,355	1,036
2010	693	533	3,536	733
2011	321	688	2,693	142
2012	312	599	3,806	1,350
2013	474	424	3,809	667
2014	361	720	3,600	544

- 5.2 In terms of completions, Table 8 demonstrates that the initial recovery in housebuilding rates seen in 2013 has not carried over into 2014. This is clearly somewhat disappointing on the face of it, but there are a number of factors at play. Firstly, the net total is lowered by the demolition of 87 existing units at Dee Park, to allow for future housebuilding. Secondly, most of the major schemes that are under construction, such as Chatham Place and Kennet Island Phase 3b consist of blocks of flats, which means that there is not a steady stream of completed units, rather the total will all be delivered in one future year. A significant number of the units under construction, for example the remainder of Avenue School, are also very close to completion.
- 5.3 The number of dwellings under construction is, however, at its highest level since 2008. This is promising for the future, particularly because it includes some major schemes in central Reading (such as Chatham Place and 80-82 Kings Road). The absence of residential development on often complicated brownfield sites in central Reading was one of the main reasons for low housebuilding rates during the recession.
- 5.4 The number of dwellings not started remains high, indicating that there is no shortage of land for housing.
- 5.5 One of the main sources of new permissions has been from the new permitted development right to change offices to residential. A total of 262 new dwellings are listed as hard commitments from this source of supply. The majority are in central Reading, although there are a number of small offices in Tilehurst centre that also have approval for residential use.
